
What is NLP?

NLP or Neuro-linguistic Programming, was co-developed by Dr. John Grinder PhD and Dr. Richard Bandler to model and replicate the patterns of exceptional performance in any field.

NLP has been described as a technology based upon an attitude of curiosity towards life, coupled to a methodology of reframing. Modelling is the heart of NLP wherever NLP is practised, be it in communications, therapy, or business.

Neuro is how the brain works to take in more information and make the best use of it.

Linguistics is how we use language to structure and enrich our experience.

Programming is how we build useful habits to build success.

NLP the art and science of human excellence is a way of bringing out the best in yourself, and in others.

Training Skills in:

Rapport building

Building better states

Multiple perceptual positions

New Code and Classic Code NLP

Accessing confidence

Changing limiting beliefs

Developing greater influence

Designing useful habits

Experiencing life more richly.

Gateway to Excellence
